

Commercial Model

#AbsaTHEREAFTER: bereavement support and family mediation for Absa Wills and Trust

The Talking Point Group (Pty) Ltd | September 2026 | All figures exclude VAT

This annexure sits behind the proposal so that the proposal itself can be about the work. It sets out how we would price the service, what is included at each layer, and where the cost exposure sits for both parties.

Everything here is a starting position. We would rather agree the shape of the model first and then fix the numbers against your actual estate volumes.

1. How the model is built

The service is priced in four layers. The first is a fixed price per estate and covers everything we do whether or not the family engages. The rest are only charged when they are used.

The reason for the split is honest and worth stating plainly. If we priced a single flat fee covering unlimited counselling across every reported estate, we would either have to price it very high to cover the worst case, or we would be exposed to a level of clinical demand neither of us can forecast before we have run this for six months. Layering it means Absa pays for outreach at a predictable unit cost, and pays for clinical work only where a family actually needs it.

THE FOUR LAYERS

- Layer 1: the outreach journey, charged per reported estate. Predictable.
- Layer 2: counselling sessions, charged per session used.
- Layer 3: clinical escalation and crisis intervention, charged per event.
- Layer 4: family mediation on contested estates, charged per matter.

A fifth, optional layer covers Absa Trust's own deceased estates staff and is priced per employee per month.

2. Layer 1: the outreach journey

Charged once per estate reported to Absa Wills and Trust, at the point the estate is handed to us for outreach. This is the whole twelve month journey set out in the proposal: six structured touchpoints, multi channel, multi language, with case management and reporting.

INCLUDED IN THE PER ESTATE PRICE

- Six scheduled contact points across the life of the estate, from week one to final account
- Two of those delivered as live voice calls by a counsellor, not SMS
- Unlimited WhatsApp containment on ListenUp for the household throughout the twelve months
- Inbound support line access, twenty four hours a day
- Household cover: surviving spouse, adult children, minor children and dependants
- Support in English, Afrikaans, isiZulu and isiXhosa
- Emotional wellbeing screening and risk identification at each contact
- Case management, dedicated Absa case lead, and quarterly anonymised trend reporting
- POPIA consent framework and data residency in South Africa

Estates reported per year	Per estate	Annual value at midpoint
0 to 2 500	R 285	R 356 250
2 501 to 6 000	R 255	R 1 084 000
6 001 to 12 000	R 225	R 2 025 000
12 001 to 25 000	R 195	R 3 608 000
25 000 and above	R 170	Floor rate

Tiering is applied on the previous twelve months of actual volume and reviewed every six months, so the rate falls as the book grows rather than being renegotiated each time.

For context on where that number comes from: we currently run a comparable bereavement outreach programme for another South African insurer at R62 per claim. That journey runs fifteen days and is SMS led. This one runs twelve months, includes two live counsellor calls, and carries the household for the full estate administration period. The unit cost reflects roughly four times the contact effort.

3. Layer 2: counselling sessions

Where a family member needs structured counselling rather than containment, sessions are arranged and delivered by a registered professional on our national panel and billed as used.

Session type	Rate	Notes
Standard session, 60 minutes	R 850	Online or telephonic
Face to face session	R 950	Where clinically indicated
Above 500 sessions per year	R 750	Applied retrospectively
Trauma debriefing, group	R 1 850	Per group session

On our current books, roughly one in ten people who engage with containment go on to need structured sessions. We would rather Absa budget on that basis than on a promise of unlimited therapy that neither of us can hold.

4. Layer 3: clinical escalation and crisis intervention

Charged per event, only where a case moves beyond counselling into active risk. This covers suicide risk escalation, complicated grief intervention, statutory protocol where abuse or violence is disclosed, and coordination of physical response.

Escalation type	Rate	Notes
Clinical escalation or crisis intervention	R 2 750	Per event
Emergency dispatch coordination	Included	Within an escalation

Armed and medical response itself is supplied by our physical response partner and is priced and contracted separately. Nothing in this annexure includes it. What we provide is the clinical decision to dispatch, made by a counsellor on the case rather than by Absa.

5. Layer 4: family mediation on contested estates

Referred by the estate administrator or surfaced by us through the outreach journey. Accredited family and commercial mediators, registered with FAMAC, SAAM and NABFAM.

Service	Rate	Notes
Intake and party assessment	R 3 500	Charged only if mediation proceeds
Mediated matter, all inclusive	R 16 500	Up to four sessions
Additional session	R 2 800	Per session beyond four
Written settlement agreement	Included	Drafted by the mediator

Set that against the alternative. A contested estate that reaches the High Court routinely costs the estate several hundred thousand rand across both sides, delays distribution by years, and puts Absa in the middle as the visible cause of the delay. Mediation typically resolves in weeks.

We would report only whether a matter settled. Absa remains the fiduciary and does not become the negotiator.

6. Optional: support for Absa Trust staff

Deceased estates administrators absorb bereaved families all day and are given nothing for it. This layer is separately priced and can run on its own, without touching a single client record.

Service	Rate	Notes
Staff programme	R 65 pepm	Minimum 100 employees
Structured team debriefing	R 1 850	Beyond two per team per year

INCLUDED PER EMPLOYEE PER MONTH

- Unlimited ListenUp containment for the employee and their household
- Two structured team debriefing sessions per team per year
- Access to the same counselling panel at the Layer 2 rates
- Anonymised team level load reporting to leadership, never individual

7. Proposed pilot

We would rather prove this than model it. A six month pilot on one region or one segment of estates, running alongside the administration, referred by hand so that nothing has to be built or integrated.

Pilot term	Structure	Value
Six months	Fixed monthly retainer	R 45 000 per month
Covers	Layer 1, up to 150 estates per month	Included
Layers 2, 3 and 4	Billed as used at the rates above	Variable
Total fixed commitment	Six months	R 270 000

WHAT ABSA GETS AT THE END OF IT

- Actual contact and engagement rates on your own book, not our averages
- What families asked for, in their own words, anonymised
- The number of disputes surfaced early and how many settled without escalation
- A defensible per estate cost to take into a full rollout business case
- An early read on wellbeing indicators across the surviving spouse population

We do not commit to a contact rate as a contractual measure. We commit to the outreach attempts, the channels, the response times and the clinical standard. Whether a grieving family answers the phone is not something either of us can promise, and we would rather say so upfront than build a KPI we both know is unenforceable.

8. Commercial terms

- All pricing excludes VAT.
- Pricing is based on a twenty four month agreement following the pilot, reviewed at twelve months.
- Annual escalation at CPI plus two percent, applied on the anniversary of commencement.
- Payment terms are thirty days from date of invoice. Layer 1 is invoiced monthly in arrears on estates handed over. Layers 2, 3 and 4 are invoiced monthly on actuals with supporting case references.
- Volume tiers are applied on trailing twelve month actuals and reviewed every six months.
- Pricing excludes printed marketing and promotional material.
- Pricing excludes armed and medical response, which is contracted and priced separately by our physical response partner.
- Services are accessible only to validated estates and household members.
- Where a statutory matter is disclosed, including domestic violence or any form of physical or sexual abuse, statutory protocol is followed immediately and at no additional charge.
- This annexure is valid for sixty days from date of issue.
